## SUMMARY

Attentive and capable full stack web developer with a web development certificate from Vanderbilt University coding bootcamp. Creative problem-solver highly motivated to developing apps in a fast-paced team environment.

## TECHNICAL SKILLS

**Softwares/Platforms: Visual Studio Code, Insomnia, Apollo Sandbox**

**Software Languages:  HTML, CSS, CSS Frameworks, JavaScript, Node.js, Express.js, SQL, MongoDB,**

**React**

## PROJECTS

**Adoptables** | https://github.com/NangTuong/Adoptables

**|** https://nangtuong.github.io/Adoptables/

- This site takes user input to make a personalized API fetch call to display information for the user. With a simple Zip code input, we display the latest pets up for adoption in the area.
- It was my responsibility to write the JavaScript to make the calls and dissect the information for display
- JavaScript

**Living Local** |https://github.com/coneboybebop/project-2-group-6

**|**https://living-locally.herokuapp.com/

- This is a forum site. It allows the user to view posts sorted by zip code to find out what locals in the area suggest. Upon signing up or logging in, the user is then allowed to make posts themselves
- It was my responsibility to create the database, the API routes, as well as help others with the Handlebars views and CSS
- JavaScript, Handlebars, CSS, SQL

**Weather Dashboard |**https://github.com/joe-white09/weather-dashboard

**|**https://joe-white09.github.io/weather-dashboard/

- This site allows users to make a forecast request by city name. It also utilizes local storage to recall the areas that the user has looked up to easily lookup those areas again.
- This entire site was created by me.
- HTML, CSS, and JavaScript

## ADDITIONAL EXPERIENCE

**Press Operator**                                                                 2017-2022

**Dana Inc**                                                                        Paris, TN

Maintained production workflow, inspected parts for quality assurance, and packaged parts for shipment. Communicated with team leaders for production needs, and designed team workflow to meet goals by deadline.

**Route Manager**                                                                  2015-2016

**Pepsi MidAmerica**                                                               Paris, TN

Oversaw the Full line sales routes (7 employees) and service technicians (4 employees) to ensure customer satisfaction as well as coordinated fleet services and repairs, and grounds upkeep. Communicated with several non-local departments to maintain all local departments were efficient

**Full Line Salesman**                                                  2011-2015/2016-2017

**Pepsi MidAmerica**                                                               Paris, TN

Maintained service on full line sales route to ensure vending machines were stocked and communicated with customers to meet their needs.

## EDUCATION
